

Yashraj Dhungana

+91 8639079613 — yashdhungana9900@gmail.com — GitHub — LinkedIn

Professional Summary

Computer Science and Engineering student with strong foundations in Python, Data Structures and Algorithms, and software development. Experienced in building and deploying web applications using Django, Flask, JavaScript, and SQL. Developed full-stack and machine learning projects with REST APIs, database integration, and production deployment. Seeking software engineering opportunities to apply problem-solving and development skills.

Education

Siddhartha Institute of Technology and Sciences

Bachelor of Technology in Computer Science and Engineering

August 2023 – 2027

Hyderabad, Ghatkesar

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

Web Technologies: HTML, CSS, React, Django, Flask, REST APIs

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools: Git, GitHub, Render

Projects

Smart Campus System – Python, Django, JavaScript, SQL

Live Demo — GitHub

- Developed a Django-based campus management platform with student authentication, complaint submission, category-based issue tracking, and administrative management.
- Implemented relational data models using Django ORM for users, complaints, notifications, status tracking, and timestamps, with Django Admin for centralized administration.
- Deployed the application with Git/GitHub and Render, configuring production deployment and integrating frontend templates with Django backend workflows.

Blood Pressure Prediction Using Machine Learning – Python, Flask, scikit-learn

Live Demo — GitHub

- Developed a Flask-based machine learning web application that predicts blood pressure from user inputs including age, weight, height, and heart rate.
- Built the prediction pipeline using Python, scikit-learn, NumPy, Pandas, and Joblib, with a trained model serialized as `bp_model.pkl` for inference.
- Implemented a REST-style `/predict` endpoint and deployed the application on Render using Gunicorn, with dependency management through `requirements.txt`.

Achievements

- **LeetCode:** Solved 100+ problems across Arrays, Strings, Hash Maps, and other DSA patterns — LeetCode
- Runner-up in College Coding Fest.
- Secured 3rd place in Project Expo at college.

Certifications

- IBM AI Fundamentals – IBM
- Gen AI Powered Data Analytics – Tata Group
